PATIENT IS BEING REFERRED FOR:

Approved Indications:

- Diabetic wounds of the lower extremities in patients with a wound classification of Wagner grade III or higher, who have failed an adequate course of standard wound therapy
- Chronic refractory osteomyelitis, unresponsive to conventional medical and surgical management
- Delayed radiation injury (*osteoradionecrosis, soft tissue radionecrosis, hemorrhagic cystitis, radiation proctitis*)
- Compromised skin grafts and flaps
- Acute arterial insufficiency (*including central retinal artery occlusion*)
- Idiopathic sudden sensorineural hearing loss
- Carbon monoxide poisoning and cyanide poisoning
- Decompression illness
- Air or gas embolism
- Gas gangrene (*clostridial myositis and myonecrosis*)
- Progressive necrotizing soft tissue infections, necrotizing fasciitis
- Acute traumatic peripheral ischemia (*crush injuries*)
- Actinomycosis, only as an adjunct to conventional therapy when the disease process is refractory to antibiotics and surgical treatment
- Intracranial abscess
- Severe anemia with exceptional blood loss (*only when blood transfusion is impossible or must be delayed*)

Other: _____

Notes: _____

Additional Information *(Please send if this information is available):*

- Current history and physical/most recent office notes
- List of current medications, implantable devices, dressings and wound care
- Recent lab/culture results, chest X-ray, radiology reports, EKG, vascular studies
