What We Treat

Hyperbaric oxygen therapy is very effective in treating a wide range of conditions either as a standalone therapy or in combination with other treatments. Medical research is ongoing and new applications for hyperbaric medicine continues to be discovered. The conditions we treat are not limited to this list of FDA approved indications:

- Diabetic Wounds of the Lower Extremities
- Soft Tissue Radiocarcinosis (delayed radiation injury)
- Compromised Skin Flaps & Grafts
- Chronic Refractory Osteomyelitis
- Osteoradionecrosis-bone death that is rare and develops some time after radiation therapy
- Acute Peripheral Arterial Insufficiency/ Central retinal artery occlusion (CRAO)
- Progressive Necrotizing Infections
- Crush Injuries
- Acute Traumatic Peripheral Ischemia
- Gas Gangrene
- Carbon Monoxide Poisoning
- Decompression Illness/sickness
- Gas Embolism
- Cyanide Poisoning
- Actinomycosis- a rare infectious bacterial disease
- Thermal Burns
- Exceptional Blood Loss Anemia
- Brain Abscess- a collection of pus enclosed in the brain tissue, caused by a bacterial or fungal infection.

How to Get Started

For HBOT therapy you do not need a referral from a healthcare provider unless your insurance requires it. To find out more or to schedule an appointment, please call 301-433-4300.

I don’t want to pay an expensive facility fee for hyperbaric oxygen treatments.

Many health systems charge a facility fee that may be more than $500 per visit. At HyperHeal, there are no hidden costs and you will NOT be charged a facility fee.

Most insurance plans accepted.

Towson
7600 Oeler Dr., Suite 305, Towson, MD 21204

Glen Burnie
1811 Crain Hwy. S., Suite B, Glen Burnie, MD 21061

Rosedale
9411 Philadelphia Rd., Suite F, Baltimore, MD 21237

Cockeysville
10540 York Rd., Suite H, Cockeysville, MD 21030

Abingdon
3401 Box Hill Corporate Center Dr., Suite 204, Abingdon, MD 21009

Pikesville
Woodholme Medical Center
1838 Greene Tree Rd., Suite 325, Pikesville, MD 21208

Westminster
826 Washington Rd., Suite 203, Westminster, MD 21157

Hyperbaric Oxygen
A safe and effective therapy for chronic, non-healing wound and other conditions.

“A five star experience!” - Lorraine
“This treatment saved my life.” - Parisa

*No expensive facility fees
Who Is HyperHeal?
A place where wounds and other conditions heal. We’re also Maryland’s premier AAAHC accredited wound care & hyperbaric facility led by Baltimore Magazine’s Top Doctor for hyperbaric medicine, Ziad K. Mirza, MD. He’s assembled a leading team of specialists, nurses and hyperbaric technicians ensuring you receive affordable, safe, effective, high-quality care and the best possible outcome.

What is Hyperbaric Oxygen Therapy (HBOT)
Your body’s tissues need an adequate supply of oxygen to function. When tissue is damaged, it requires even more oxygen to survive. Breathing pure oxygen in a pressurized chamber increases the amount of oxygen your blood can carry. This supersaturates your body with oxygen, creating an environment that promotes healing and helps fight infection. In sum, it’s a safe and effective therapy that provides extraordinary health benefits.

How Does HBOT Work?
The hyperbaric oxygen environment changes the relative pressures of oxygen, nitrogen, and other gases in the blood, organs, and tissues. Normally oxygen is carried by hemoglobin on red blood cells but under higher pressures, oxygen dissolves in the blood plasma. This oxygen-rich plasma is now able to travel 3 to 4 times deeper into the tissue supporting the healing process.

What are the Benefits of HBOT?
HBOT helps to create the optimal environment for the body’s natural healing process which produces the following benefits:

- Reduces inflammation and swelling
- Helps fight Infection
- Builds New Blood Vessels
- Produces Healthy Tissue
- Improves Circulation
- Aids in Promoting Healing

What Does an HBOT Treatment Feel Like?
The increased air pressure in the chamber will create a temporary feeling of fullness in your ears — similar to what you might feel in an airplane or at a high elevation. This can be relieved by yawning or swallowing. During treatment, our highly qualified team will monitor your progress and ensure you are comfortable.

Will HBOT Work?
The short answer is yes. The benefits of HBOT is cumulative making it critical you make scheduled appointments. You will need more than one session. For example, a non-healing wound may require treatments that last up to two hours for a total of 20 to 40 treatments.
